

FOR A COST EFFECTIVE BUFFET

Prioritize Produce

Produce offers the lowest cost point for your buffet. Ensure that fresh salads, crudité with dips, parfaits with fresh fruit, and colorful fruit displays are prominently displayed at the beginning of your buffet lines. They should be eye-catching and inviting.

Opt for Bite-Size Portions

Serve everything in bite-size portions to prevent guests from taking more than they can eat. This helps manage food waste and ensures a better dining experience for your customers.

Fresh is Better than Fast

Consider cost-effective alternatives such as making fried breakfast potatoes in-house rather than using pre-made frozen products. Not only does this save money, but it also enhances the flavor of the dish.
